Author Index

Amara, M.
— and Kerdjoudj, H.
Separation of metallic ions using cation exchange resin in the presence of organic macrocation. Mechanism of surface layer formation 247
Ariese, F., see Dijkstra, R.J. 127
Asensio, E., see Nerín, C. 185
Atsuya, I., see Zhang, Q. 99

Bendicho, C., see Filgueiras, A.V. 217
Brinkman, U.A.Th., see Dijkstra, R.J. 127

Cavalheiro, E.T.G., see Teixeira, M.F.S. 79
Cerdà, V., see Manera, M. 23
Chen, F.-R., see Huang, Z.-Y. 239
Chen, N., see Wang, J. 171
Chen, X., see Li, Y. 17
Chen, Z., see Su, R. 11
Cheng, J., see Zheng, D. 225
Cheng, J.-K., see Zhang, L.-Y. 141
Cheng, Y., see Li, Y. 17
Chung, L.P.K., see Sin, D.W.M. 147
Cooper, W.T., see Schilling, M. 207
Cui, S., see Li, Y. 17

Davidson, C.M.
—, Hursthouse, A.S., Tognarelli, D.M., Ure, A.M. and Urquhart, G.J.
Should acid ammonium oxalate replace hydroxylammonium chloride in step 2 of the revised BCR sequential extraction protocol for soil and sediment? 193
Davison, W., see Warnken, K.W. 41
de Diego, A., see Sanz Landaluze, J. 107
Delacote, C., see Walcarius, A. 87
Dijkstra, R.J.
—, Gerssen, A., Efremov, E.V., Ariese, F., Brinkman, U.A.Th. and Gooijer, C.
Substrates for the at-line coupling of capillary electrophoresis and surface-enhanced Raman spectroscopy 127
Dockal, E.R., see Teixeira, M.F.S. 79
Dong, D., see Zheng, D. 225

Efremov, E.V., see Dijkstra, R.J. 127
Eggenkamp, H.G.M., see Musashi, M. 37
Ensafi, A.A., see Ghasemi, J. 119
Estela, J.M., see Manera, M. 23
Etienne, M., see Walcarius, A. 87

Filgueiras, A.V.
—, Lavilla, I. and Bendicho, C.
Development of fast thermal programs in electrothermal atomic absorption spectrometry using hot injection and removal of the ashing stage for determination of heavy metals in sequential extracts from sediments 217
Fritz, J.S., see Gazda, D.B. 53

Gangadharan, B., see Reddy, S.M. 71
Gao, Y., see Su, R. 11
García, C.D.
— and Henry, C.S.
Enhanced determination of glucose by microchip electrophoresis with pulsed amperometric detection 1
García-Falcón, M.S.
—, Pérez-Lamela, C. and Simal-Gándara, J.
Strategies for the extraction of free and bound polycyclic aromatic hydrocarbons in run-off waters rich in organic matter 177
Gazda, D.B.
—, Fritz, J.S. and Porter, M.D.
Determination of nickel(II) as the nickel dimethylglyoxime complex using colorimetric solid phase extraction 53
Gerssen, A., see Dijkstra, R.J. 127
Ghasemi, J.
—, Saaidpour, S. and Ensafi, A.A.
Simultaneous kinetic spectrophotometric determination of periodate and iodate based on their reaction with pyrogallol red in acidic media by chemometrics methods 119
Ghosh, P.
—, Krishna Reddy, M.M., Ramteke, V.B. and Sashidhar Rao, B.
Analysis and quantitation of diazepam in cream biscuits by high-performance thin-layer chromatography and its confirmation by mass spectrometry 31
Gooijer, C., see Dijkstra, R.J. 127
Guo, L.-H., see Zheng, D. 225
Gupta, V.K., see Prasad, R. 61

Henry, C.S., see García, C.D. 1
Hu, Z., see Li, Y. 17
Huang, J., see Wang, J. 171
Huang, Z.-Y.
—, Chen, F.-R., Zhuang, Z.-X., Wang, X.-R. and Lee, F.S.C.
Trace lead measurement and on-line removal of matrix interference in seawater by isotope dilution coupled with flow injection and ICP-MS 239
Hursthouse, A.S., see Davidson, C.M. 193

Inoue, S., see Zhang, Q. 99

Jasińska, A.
— and Nalewajko, E.
Batch and flow-injection methods for the spectrophotometric determination of olanzapine 165
Jiang, Z., see Wang, J. 171

Kerdjoudj, H., see Amara, M. 247
Krishna Reddy, M.M., see Ghosh, P. 31
Kumar, A., see Prasad, R. 61

Lai, M.M.C., see Sin, D.W.M. 147
Lavilla, I., see Filgueiras, A.V. 217
Lee, F.S.C., see Huang, Z.-Y. 239
Li, Y.
—, Cui, S., Cheng, Y., Chen, X. and Hu, Z.
Application of nonaqueous capillary electrophoresis for quantitative analysis of quinolizidine alkaloids in Chinese herbs 17

doi:10.1016/S0003-2670(04)00232-6

Li, Y.-G., see Zheng, D. 225
Lin, J.-M., see Su, R. 11
Liu, Y.-M., see Zhang, L.-Y. 141
Liu, Y.-M.
—, Vaughn, K., Song, Y. and Prasad, C.
High-performance liquid chromatography–tandem mass spectrometry of enterostatins in biological samples 159
López-Sánchez, J.F., see Pardo, P. 201

Madariaga, J.M., see Sanz Landaluze, J. 107
Manera, M.
—, Miró, M., Estela, J.M. and Cerdà, V.
A multisyringe flow injection system with immobilized glucose oxidase based on homogeneous chemiluminescence detection 23
Manini, J., see Reddy, S.M. 71
Marino, G., see Teixeira, M.F.S. 79
Minami, H., see Zhang, Q. 99
Miró, M., see Manera, M. 23
Mohr, G.J.
Tailoring the sensitivity and spectral properties of a chromoreactand for the detection of amines and alcohols 233
Mongay-Fernández, C., see Sebastián-Francisco, I. 135
Musashi, M.
—, Oi, T. and Eggenkamp, H.G.M.
Experimental determination of chlorine isotope separation factor by anion-exchange chromatography 37

Nalewajko, E., see Jasińska, A. 165
Nerín, C.
— and Asensio, E.
Behaviour of organic pollutants in paper and board samples intended to be in contact with food 185

Oi, T., see Musashi, M. 37

Pardo, P.
—, Rauret, G. and López-Sánchez, J.F.
Shortened screening method for phosphorus fractionation in sediments. A complementary approach to the standards, measurements and testing harmonised protocol 201
Pérez-Lamela, C., see García-Falcón, M.S. 177
Porter, M.D., see Gazda, D.B. 53
Prasad, C., see Liu, Y.-M. 159
Prasad, R.
—, Gupta, V.K. and Kumar, A.
Metallo-tetraazaporphyrin based anion sensors: regulation of sensor characteristics through central metal ion coordination 61

Qu, F., see Su, R. 11

Ramis-Ramos, G., see Sebastián-Francisco, I. 135
Ramteke, V.B., see Ghosh, P. 31
Raposo, J.C., see Sanz Landaluze, J. 107
Rauret, G., see Pardo, P. 201
Reddy, S.M.
—, Gangadharan, B. and Manini, J.
Amperometric sensor study of the selectivity of poly(vinyl chloride) membranes plasticised with surfactants and liquid crystals 71

Saaidpour, S., see Ghasemi, J. 119
Sanz Landaluze, J.
—, de Diego, A., Raposo, J.C. and Madariaga, J.M.
Methylmercury determination in sediments and fish tissues from the Nerbioi-Ibaizabal estuary (Basque Country, Spain) 107
Sashidhar Rao, B., see Ghosh, P. 31
Schilling, M.
— and Cooper, W.T.
Effects of chemical treatments on the quality and quantitative reliability of solid-state ^{13}C NMR spectroscopy of mineral soils 207
Sebastián-Francisco, I.
—, Simó-Alfonso, E.F., Mongay-Fernández, C. and Ramis-Ramos, G.
Improvement of the electrophoretic protein profiles of Leguminosae gums extracts using gamanase and application to the evaluation of carob–guar mixtures 135
Simal-Gándara, J., see García-Falcón, M.S. 177
Simó-Alfonso, E.F., see Sebastián-Francisco, I. 135
Sin, D.W.M.
—, Chung, L.P.K., Lai, M.M.C., Siu, S.M.P. and Tang, H.P.O.
Determination of quinoxaline-2-carboxylic acid, the major metabolite of carbadox, in porcine liver by isotope dilution gas chromatography–electron capture negative ionization mass spectrometry 147
Siu, S.M.P., see Sin, D.W.M. 147
Song, Y., see Liu, Y.-M. 159
Su, R.
—, Lin, J.-M., Qu, F., Chen, Z., Gao, Y. and Yamada, M.
Capillary electrophoresis microchip coupled with on-line chemiluminescence detection 11

Tang, H.P.O., see Sin, D.W.M. 147
Teixeira, M.F.S.
—, Marino, G., Dockal, E.R. and Cavalheiro, E.T.G.
Voltammetric determination of pyridoxine (Vitamin B_6) at a carbon paste electrode modified with vanadyl(IV)–Salen complex 79
Tognarelli, D.M., see Davidson, C.M. 193

Ure, A.M., see Davidson, C.M. 193
Urquhart, G.J., see Davidson, C.M. 193

Vaughn, K., see Liu, Y.-M. 159

Walcarius, A.
—, Etienne, M. and Delacote, C.
Uptake of inorganic Hg^{II} by organically modified silicates: influence of pH and chloride concentration on the binding pathways and electrochemical monitoring of the processes 87
Wang, F.-Q., see Zheng, D. 225
Wang, J.
—, Ye, H., Jiang, Z., Chen, N. and Huang, J.
Determination of diethylstilbestrol by enhancement of luminol–hydrogen peroxide–tetrasulfonated cobalt phthalocyanine chemiluminescence 171
Wang, N., see Zheng, D. 225
Wang, X.-R., see Huang, Z.-Y. 239
Wang, Z.-L., see Zhang, L.-Y. 141
Warnken, K.W.
—, Zhang, H. and Davison, W.
Performance characteristics of suspended particulate reagent-iminodiacetate as a binding agent for diffusive gradients in thin films 41

Yamada, M., see Su, R. 11
Yang, X.-Q., see Zheng, D. 225
Ye, H., see Wang, J. 171

Zhang, H., see Warnken, K.W. 41
Zhang, L.-Y.
—, Liu, Y.-M., Wang, Z.-L. and Cheng, J.-K.
Capillary zone electrophoresis with pre-column NDA derivatization and amperometric detection for the analysis of four aliphatic diamines 141

Zhang, Q.
—, Minami, H., Inoue, S. and Atsuya, I.
Differential determination of trace amounts of arsenic(III) and arsenic(V) in seawater by solid sampling atomic absorption spectrometry after preconcentration by coprecipitation with a nickel–pyrrolidine dithiocarbamate complex 99

Zheng, D.
—, Wang, N., Wang, F.-Q., Dong, D., Li, Y.-G., Yang, X.-Q., Guo, L.-H. and Cheng, J.
Sensitive chemically amplified electrochemical detection of ruthenium tris-(2,2′-bipyridine) on tin-doped indium oxide electrode 225
Zhuang, Z.-X., see Huang, Z.-Y. 239
